

# FREE CLINIC OPENED FOR CONSUMPTIVES

**DR. MARY R. NOBLE MADE  
MEDICAL DIRECTOR**

**Indigent Sufferers Are Offered  
Relief Thru Public Health  
Association**

A tubercular clinic established for the benefit of sufferers from the white plague who should receive free treatment from the best available physicians will be opened at the headquarters of the Visiting Nurse association, 302 South Wahsatch avenue, within the next few days. The clinic will be in direct charge of Dr. Mary Riggs Noble as medical field director.

Plans for the clinic have been under way for some time, but it was not until yesterday that arrangements were completed. The clinic will be opened under the auspices of the Colorado Springs branch of the Colorado Public Health association, which was recently formed here, and in addition to the handling of tubercular cases will cooperate in the baby welfare movement.

The following committee will have charge of the clinic: The Rev. Arthur N. Taft, chairman; Clarence P. Dodge, Senator David Elliot, Dr. C. F. Gardner, Dr. C. O. Giese, Dr. G. B. Gilmore, C. C. Hamlin, Dr. P. O. Hanford, Mrs. B. H. Hopkins, Asa T. Jones, Mrs. Spencer Penrose and E. P. Shove. All members of the local committee are also directors of the Colorado Public Health association.

The executive committee is made up of Dr. G. B. Webb, Dr. C. O. Giese, Asa T. Jones and the Rev. Arthur N. Taft, ex-officio. Justin L. Hills will be secretary-treasurer of the organization.

The clinic is opened with the cooperation of the Visiting Nurse association, which has donated two rooms of its headquarters building for the

purpose. The latter organization also will assist in the care of patients and will take an active interest in all work of the clinic. Dr. Mary Riggs Noble, who will have charge of the clinic, for several years has been active in public health work.

In announcing the establishment of the clinic yesterday Mr. Hills stated that it was the hope of the committee to care for scores of tubercular persons who otherwise would be unable to get medical attention and good nursing. "There are many such cases in the region," Mr. Hills said, "all of them deserving, and we believe the clinic will fill a long felt need in the community. In time we hope to include other diseases than tuberculosis, but at present it is believed best that we confine ourselves to the treatment of tuberculars."
