

The prospects are very fair for having Manitou lighted by the electric light this coming season. A gentleman is expected here in the course of a few days who arranged the plant at the Montezuma Hotel in Las Vegas, New Mexico, and it is expected that satisfactory arrangements can be made with him for placing a plant in Manitou. It is thought that the Iron Springs Company will put in the plant and that arrangements will be made with that company for lighting the lower end of the town. Let us have the electric light by all means.
