

James R. Shields Killed in Action

City Hall and Court House

All members of the police department have been given strict orders to see that influenza rules are strictly observed. Yesterday patrolmen and officers visited all restaurants and hotel dining rooms in order to see that the rules were properly observed.

"We expect to have these rules observed absolutely," Chief Harper said yesterday. "In every instance the restaurant and hotel proprietors will be held responsible for their observance. If patrons refuse to observe them then the police department will be called and the offenders will answer in police court."
