C. S. HISTORY MAKERS ON BRONZE MEDALLIONS

Left to Right—Gen. William J. Palmer, Lieut. Zebulon Pike and Tahoma, the Indian, in bronze medallions, which decorate the new spring house over Tahoma spring, in Monument Valley park. General Palmer founded the city. Lieutenant Pike discovered Pike's Peak, and Tahoma was the Indian friend of the early explorers.

Girl Reserve

Notes

Miss Ethel Niemeyer, who is a national secretary of the Girls Reserve department, visited the Colorado Springs association on Tuesday and Wednesday.

Some of the High School Girls Reserve came to meet Miss Niemeyer on Tuesday, and were delightedly entertained by her account of Girls Reserve in Honolulu, where she had been Girls Reserve secretary for two years.

Miss Niemeyer was the honored guest at a dinner in the Y. W. C. A. meeting at North Junior High school on Tuesday. The afternoon program began with the singing of America and the salute to the flag. Miss Harriet Lull led the discussion on "A Girl's Love of the Beautiful." Much interest was shown for the Girls Reserve and the girls are going to make a list of books which they think are valuable for giving true ideals about life.

Ninth Grade Girls Reserve met at North Junior on Monday at the close of school. The life of Lincoln was discussed under different topics, such as Lincoln's ancestry, his love for books, his life in New Salem, and romance with Ann Rutledge and a part of "The Perfect Tribute" by Mary Raymond Shipman Andrews was given. The girls who contributed to the program were: Mildred Rock, Gertrude Sweitzer, Margaret Dorshol and Edna Bloomquist.

Sigma Iota Delta and the Girls Club Triangle held a joint meeting, the privilege of hearing Miss Niemeyer being given in other places. The pictures of Girls Reserve activities in Honolulu were shown.

The girls entertained their men friends. The decorations were green and white and the St. Patrick's color scheme was also carried out in the refreshments.

Sophomore Girls Reserve of the High school held a Circle of Light for the reception of new members on Friday afternoon. Victoria Edstrom acted as Keeper of the Light and Mabel Duke as Herald of the Light. A social hour followed.

The Girls' Club Triangle went on a hike Saturday morning to Juneau Inlet and Buffalo cove. Mrs. Wilsey, the adviser for this group, told the girls about the different types of the region and a number of birds were noted. Miss Millie Milkken, the Y. W. C. A. physical director, also accompanied the girls.

This triangle met with the South Junior Triangle on Wednesday to hear Miss Niemeyer, the National Girls Reserve secretary.

Wanted Test

The courts through the land have decided that a motorist may be a good Samaritan at his own risk.

Yet many drivers continue to take that risk, having such unalterable trust in human appreciation and good sportsmanship.

Many drivers have been jolted out of this faith by the lack of appreciation and sportsmanship shown by even the best of friends. They have found themselves embarrassed in court by suitemates because having picked up a friend on the way down town, they carelessly permitted that friend to get hurt in an accident.

It must be remembered that the good host must take extreme care of the health and vigor of his guest, whether at home or in the car. And if he happens to strike another automobile or a post, enough to put a scratch on his guest's dress, the host.

POOR SAMARITANS

The courts throughout the land have decided that a motorist may be a good Samaritan at his own risk.

And the appreciative pedestrian won't expect you to stop for him.

MOVING PICTURE OF ATOM SHOWN TO SCIENTISTS

BERLIN, March 6 (UP)—A moving picture of how a nitrate atom was being shunted with the aid of alpha rays and converted into hydrogen was produced before the Kaiser Wilhelm society for the advancement of science at a lecture given by Miss Lise Meitner, professor of chemistry.

The movie is the first successful attempt to film the atom, which for a long time was considered the smallest.
